# Apache License 2.0

- permissive license, not copyleft license
- it does not require a derivative work of the software, or modifications to the original, to be distributed using the same license
- It still requires application of the same license to all unmodified parts. In every licensed file, original copyright, patent, trademark, and attribution notices must be preserved

# ASF Contributor Agreements

The purpose of this agreement is to clearly define the terms under which intellectual property has been contributed to the ASF and thereby allow us to defend the project should there be a legal dispute regarding the software.

An individual must have submitted a signed ICLA to the ASF before we give them commit rights to any ASF project.
